

Globe Metal Recycling is a leading metal recycler with 40+ years of experience processing and trading metals through our global network. Our business includes processing and recycling industrial metals for manufacturing companies, and supplying cost effective high quality minor and primary metals, ferroalloys, high temperature alloys and specialty steels to mills and foundries. Our emphasis is on molybdenum, tungsten, niobium, nickel, cobalt, super alloys and titanium. We are ISO certified and approved recyclers and suppliers to many blue chip companies and small businesses alike. All our customers and suppliers are very important to us and we strive to provide superior quality and service with each and every transaction.
