

## **Tungsten Vietnam JSC - Tungsten producer**

Tungsten Vietnam JSC is situated in Thai Nguyen, Vietnam. We specialize in processing tungsten containing materials to sodium tungstate, we are also reclaiming other valuable elements such as nickel (Ni), molybdenum (Mo), titanium (Ti), vanadium (V) and cobalt (Co).

### **What We Do:**

Our core activity is processing of low grade tungsten and molybdenum materials.

Everyday, we work to improve our process for reclaiming various materials that contain valuable elements in an efficient and cost-effective manner, while also upholding local environmental regulations and adding value to the supply chain. Additionally, we engage in international trade to expand our reach and providing our offerings to global market.

### **Building Connections:**

We joined the Minor Metals Trade Association (MMTA) as a way to establish ties with other companies in the same field. By fostering these connections, we aim to grow and improve, learning from others and exploring new opportunities within the industry.

### **Looking Ahead:**

We are committed to continuous improvement and growth with an emphasis on refining our expertise in processing tungsten and related materials. We look forward to working with companies that share our values and goals, and we are excited about the opportunities that await us in both production and international trade.
